

Section 1: Identification of the Substance/Mixture and of the Company/Undertaking

1.1 Product identifier

Product Name • Titanium Alloy and Castings

1.2 Relevant identified uses of the substance or mixture and uses advised against

Relevant identified
use(s)• Aircraft Engine Blades and Vanes Industrial Gas Turbine Components for power
generation

1.3 Details of the supplier of the safety data sheet

Manufacturer • PCC Structurals, Inc. 4600 SE Harney Drive Portland, OR 97206 United States

1.4 Emergency telephone number

Manufacturer • 800-424-9300 - CHEMTREC

Section 2: Hazards Identification

EU/EEC

According to: Regulation (EC) No 1272/2008 (CLP)/REACH 1907/2006 [amended by 453/2010] According to: EU Directive 67/548/EEC (DSD) or 1999/45/EC (DPD)

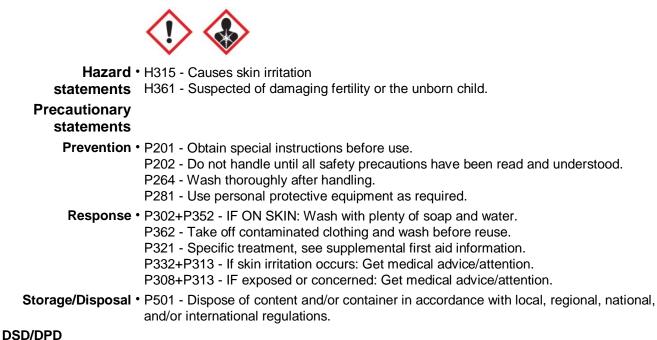

2.1 Classification of the substance or mixture

CLP	 Products do not present an inhalation, ingestion or skin contact health hazard under normal handling and use as it is in a metallic form. However, processes such as welding, grinding, burning, melting, or otherwise generating dust, fumes and gases may present a health hazard. Skin Irritation 2 - H315 Reproductive Toxicity 2 - H361
DSD/DPD	 Irritant (Xi) Substances Toxic To Reproduction - Category 3
2.2 Label Elemer	R38, R63

2.2 Label Elements

CLP

WARNING

J2D/DPD

Risk phrases • R38 - Irritating to skin.

R63 - Possible risk of harm to the unborn child.

Safety phrases • S37 - Wear suitable gloves.

2.3 Other Hazards

CLP	 May form combustible dust concentrations in air. According to Regulation (EC) No. 1272/2008 (CLP) this material is considered hazardous.
DSD/DPD	 May form combustible dust concentrations in air. According to European Directive 1999/45/EC this material is considered dangerous.

United States (US)

According to: OSHA 29 CFR 1910.1200 HCS

2.1 Classification of the substance or mixture

OSHA HCS 2012
 Products do not present an inhalation, ingestion or skin contact health hazard under normal handling and use as it is in a metallic form. However, processes such as welding, grinding, burning, melting, or otherwise generating dust, fumes and gases may present a health hazard. Skin Irritation 2
 Reproductive Toxicity 2
 Specific Target Organ Toxicity Repeated Exposure 1
 Combustible Dust

2.2 Label elements

OSHA HCS 2012

DANGER

	Causes skin irritation
statements	Suspected of damaging fertility or the unborn child. Causes damage to organs through prolonged or repeated exposure.
	May form combustible dust concentrations in air.
Precautionary statements	
Prevention	• Obtain special instructions before use.
	Do not handle until all safety precautions have been read and understood. Do not breathe dust.
	Wash thoroughly after handling.
	Do not eat, drink or smoke when using this product.
	Wear protective gloves, clothing , and eye/face protection , .
Response	 If on skin: Wash with plenty of water.
	Take off contaminated clothing and wash before reuse. Specific treatment, see supplemental first aid information.
	If skin irritation occurs: Get medical advice/attention.
	IF exposed or concerned: Get medical advice/attention.
Storage/Disposal	 Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.
2.3 Other hazards	
OSHA HCS 2012	• Under United States Regulations (29 CFR 1910.1200 - Hazard Communication Standard), this product is considered hazardous.

Section 3 - Composition/Information on Ingredients

3.1 Substances

• Material does not meet the criteria of a substance.

3.2 Mixtures

	Composition				
Chemical Name	Identifiers	%	LD50/LC50	Classifications According to Regulation/Directive	Comments

Section 4 - First Aid Measures

4.1 Description of first aid measures

- **Inhalation** Move victim to fresh air. Give artificial respiration if victim is not breathing. Administer oxygen if breathing is difficult. If signs/symptoms continue, get medical attention.
- **Skin** In case of contact with substance, immediately flush skin with running water for at least 20 minutes. If skin irritation occurs: Get medical advice/attention.
- **Eye** In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. If eye irritation persists: Get medical advice/attention.
- **Ingestion** Rinse mouth. Do not give anything by mouth to an unconscious person. Get medical attention if symptoms occur.

4.2 Most important symptoms and effects, both acute and delayed

• Refer to Section 11 - Toxicological Information.

4.3 Indication of any immediate medical attention and special treatment needed

- **Notes to** All treatments should be based on observed signs and symptoms of distress in the patient.
- **Physician** Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Section 5 - Firefighting Measures

5.1 Extinguishing media

Suitable Extinguishing	 Use special mixtures of dry chemical, or sand.
Media	Use Class D extinguishers, if dust is generated and ignited.

Unsuitable Extinguishing • Do not use water. Media

5.2 Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards	 Solid, massive form of material is not combustible. Fire and explosion hazards are moderate when material is in the form of dust and exposed to heat or flames, or by chemical reaction. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
Hazardous Combustion Products	No data available
E 2 Advice for firefiel	

5.3 Advice for firefighters

• Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.

Section 6 - Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal Precautions	 Special precautions are not necessary for solid castings. If large quantities of dust are spilled: Ventilate enclosed areas. Wear appropriate personal protective equipment, avoid direct contact. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.
Emorgonev	• Use normal clean up presedures. Contain spill and monitor for excessive dust

EmergencyUse normal clean up procedures. Contain spill and monitor for excessive dust accumulation. Avoid unnecessary personnel and equipment traffic in the spill area.

6.2 Environmental precautions

• Prevent entry into waterways, sewers, basements or confined areas.

6.3 Methods and material for containment and cleaning up

Containment/Clean-up • Avoid generating dust.

Measures Use clean nonsparking tools to collect material. Carefully shovel or sweep up spilled material and place in suitable container. Dust Deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Residues should be evaluated for metal leachability and consignable waste standards. Do not use compressed air for cleanup.

6.4 Reference to other sections

• Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

Section 7 - Handling and Storage

7.1 Precautions for safe handling

Handling • Use only with adequate ventilation. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Wear appropriate personal protective equipment, avoid direct contact. Do not breathe dust or fumes. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.

7.2 Conditions for safe storage, including any incompatibilities

Storage • Store in a cool, dry place. Keep away from incompatible materials.

7.3 Specific end use(s)

• Refer to Section 1.2 - Relevant identified uses.

Section 8 - Exposure Controls/Personal Protection

8.1 Control parameters

			Exposure Limits	s/Guidelines

Exposure Control Notations

France

•Vanadium (7440-62-2): Mutagens: (Mutagen categories 1A, 1B, 2) | Reproductive Toxins: (Reproductive Toxin categories 1A, 1B, 2) ACGIH

•Aluminum (7429-90-5): Carcinogens: (A4 - Not Classifiable as a Human Carcinogen)

•Chromium (7440-47-3): Carcinogens: (A4 - Not Classifiable as a Human Carcinogen)

•Zirconium (7440-67-7): Carcinogens: (A4 - Not Classifiable as a Human Carcinogen)

Germany DFG

•Aluminum (7429-90-5): Pregnancy: (classification not yet possible (respirable, inhalable, dust))

•Vanadium (7440-62-2): Carcinogens: (Category 2 (considered to be carcinogenic for man))

•Zirconium (7440-67-7): Pregnancy: (classification not yet possible) | Sensitizers: (respiratory and skin sensitizer)

Exposure Limits Supplemental ACGIH

•Aluminum (7429-90-5): TLV Basis - Critical Effects: (pneumoconiosis; lower respiratory tract irritation; neurotoxicity)

•Chromium (7440-47-3): TLV Basis - Critical Effects: (skin and upper respiratory tract irritation)

•Tin (7440-31-5): TLV Basis - Critical Effects: (pneumoconiosis (or stannosis))

8.2 Exposure controls

Engineering Measures/Controls	 Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Ensure that dust handling systems (such as exhaust ducts, dust collectors, vessels and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is not leakage from the equipment). It is recommended that dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion supression system or an oxygen-deficient environment. Use only appropriately classified electrical equipment.
Personal Protective E	quipment
Respiratory	 For limited exposure use an N95 dust mask. For prolonged exposure use an air-purifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.
Eye/Face	Wear safety goggles.
Hands	Wear appropriate gloves.

Skin/Body

• Wear long sleeves and/or protective coveralls.

• Follow best practice for site management and disposal of waste.

Environmental

Exposure Controls

Key to abbreviations

- ACGIH = American Conference of Governmental Industrial Hygiene
- MAK = Maximale Arbeitsplatz Konzentration is the maximum permissible concentration
- NIOSH = National Institute of Occupational Safety and Health
- OSHA = Occupational Safety and Health Administration
- TLV = Threshold Limit Value determined by the American Conference of Governmental Industrial Hygienists (ACGIH)
- TWA = Time-Weighted Averages are based on 8h/day, 40h/week exposures
- STEL = Short Term Exposure Limits are based on 15-minute exposures

Section 9 - Physical and Chemical Properties

9.1 Information on Physical and Chemical Properties

Material Description			
Physical Form	Solid	Appearance/Description	Solid metal alloy.
Color	Data lacking	Odor	Data lacking
Odor Threshold	Data lacking		
General Properties			
Boiling Point	3260 C(5900 F) (for Titanium)	Melting Point/Freezing Point	1675 C(3047 F) (Titanium)

9.2 Other Information

· No additional physical and chemical parameters noted.

Section 10: Stability and Reactivity

10.1 Reactivity

• Molten metal reacts violently with water. Store away from oxidizers, can react violently.

10.2 Chemical stability

• Stable under normal temperatures and pressures.

10.3 Possibility of hazardous reactions

· Hazardous polymerization will not occur.

10.4 Conditions to avoid

• Avoid generating dust.

10.5 Incompatible materials

• Material may be incompatible with acids, bases, and oxidizers.

10.6 Hazardous decomposition products

• No data available

Section 11 - Toxicological Information

11.1 Information on toxicological effects

		Components
Aluminum (3% TO 6%)	7429- 90-5	Multi-dose Toxicity: Inhalation-Man TCLo • 4 mg/m ³ 1 Year(s)-Intermittent; <i>Lungs, Thorax, or Respiration</i> :Cough; <i>Lungs, Thorax, or Respiration</i> :Dyspnea; <i>Nutritional and Gross Metabolic:Gross Metabolite Changes</i> :Weight loss or decreased weight gain; Inhalation-Rat TCLo • 206 mg/m ³ 5 Hour(s) 30 Day(s)-Intermittent; <i>Lungs, Thorax, or Respiration</i> :Fibrosis (interstitial); <i>Endocrine</i> :Hypoglycemia; <i>Blood</i> :Changes in serum composition (e.g., TP, bilirubin cholesterol)

Potential Health Effects

i otentiai ne	
Inhalation	
Acute (Immediate)	 May cause respiratory irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible.
Chronic (Delayed) Skin	 Extended exposure to excessive concentrations of metal fumes and dusts can be associated with permanent changes in the lung function and pulmonary diseases.
JKIII	
Acute (Immediate)	 Causes skin irritation. May cause skin sensitization. Symptoms include redness, and skin rash.
Chronic (Delayed)	• No data available.
Eye	
Acute (Immediate)	 Exposure to dust may cause mechanical irritation. Excessive concentrations of nuisance dust in the workplace may reduce visibility and may cause unpleasant deposits in eyes.
Chronic (Delayed)	• No data available.
Ingestion	
Acute (Immediate)	 Excessive concentrations of nuisance dust in the workplace may cause mechanical irritation to mucous membranes.
Chronic (Delayed)	• No data available

Reproductive Effects • Repeated and prolonged exposure may cause reproductive effects.

15.2 Chemical Safety Assessment

• No Chemical Safety Assessment has been carried out.

Section 16 - Other Information

Relevant Phrases (code & full text)

	H228 - Flammable solid
	H250 - Catches fire spontaneously if exposed to air
	H260 - In contact with water releases flammable gases which may ignite spontaneously
	H261 - In contact with water releases flammable gas
	H302 - Harmful if swallowed
	H319 - Causes serious eye irritation
	H335 - May cause respiratory irritation
	H373 - May cause damage to organs through prolonged or repeated exposure.
	H413 - May cause long lasting harmful effects to aquatic life
	R11 - Highly flammable.
	R15 - Contact with water liberates extremely flammable gases.
	R17 - Spontaneously flammable in air.
	R22 - Harmful if swallowed.
	R36/37/38 - Irritating to eyes, respiratory system and skin.
	R36/38 - Irritating to eyes and skin.
	R37 - Irritating to respiratory system.
